PROFESSIONAL SUMMARY

Motivated Software Engineering Undergraduate with hands-on experience in full-stack web development, software design, database management, and modern application development. Proficient in Java, Python, JavaScript, TypeScript, React.js, Next.js, Firebase, and MySQL. Proven track record of delivering enterprise-level academic projects including e-commerce platforms, inventory management systems, and distribution network applications. Passionate about building scalable, innovative software solutions.

TECHNICAL SKILLS

- Programming Languages: Java, Python, JavaScript, TypeScript, SQL, C#
- Front-End Development: HTML5, CSS3, Bootstrap, Tailwind CSS, React.js, Next.js
- Back-End Development: Node.js, Express.js, Firebase, ASP.NET MVC
- Database Technologies: MySQL, MongoDB, Firebase Firestore, SQL Server
- Development Tools: Git, GitHub, Visual Studio Code, Visual Studio, Postman, Cisco Packet Tracer
- Other: Software Testing, UI/UX Design, SEO, Agile Development, System Analysis & Design

EDUCATION

BEng (Hons) Software Engineering | London Metropolitan University, UK *Expected 2027*

Higher National Diploma (HND) in Computing | Software Engineering Specialization

Diploma in Information Technology |

PROJECTS

Plant Hub – Plant Nursery E-Commerce & Inventory Management System |

Technologies: React.js, Node.js, Express.js, MongoDB

- Developed a full-stack e-commerce platform for plant nursery management with inventory tracking, customer ordering, reviews, and administration features.
- Designed RESTful APIs with Node.js/Express.js and integrated MongoDB for dynamic product and order management.

EcoPlate – Sustainable Food Sharing Platform |

Technologies: Next.js, TypeScript, Firebase

- Built a food donation and redistribution platform with secure user authentication and role-based access control.
- Integrated Firebase Firestore for real-time database operations supporting multiple user roles.

IslandLink Sales Distribution Network (ISDN) |

Technologies: Next.js, Firebase, TypeScript

- Developed an enterprise-level sales distribution management system with multi-role dashboards and secure authentication.
- Implemented real-time data synchronization and access control for distributor and admin roles.

GreenLife Organic Store Management System |

Technologies: C#, WinForms, SQL Server

- Built a desktop application for inventory and sales management with full CRUD functionality and reporting features.

UniManage – University Course Management System |

Technologies: ASP.NET MVC, SQL Server

- Developed a university management platform supporting student enrollment, grading, assignments, and role-based access control.

CERTIFICATIONS

- Python Programming Certification – University of Moratuwa
- Diploma in Information Technology
- Diploma in English
- Graphic Design Certification

ACHIEVEMENTS & ACTIVITIES

- Delivered multiple full-stack software engineering projects covering web, desktop, and enterprise application domains.
- Experienced in database design, system analysis, and end-to-end software development lifecycle.
- Knowledgeable in SEO and digital marketing strategies for web applications.
- Competitive Wushu practitioner demonstrating discipline and teamwork.
